If	irritation persists a	fter washing, get medica	al attention. Launder

V - REACTIVITY INFORMATION
X STABLE UNSTABLE CONDITIONS TO AVOID None
HAZARDOUS DECOMPOSITION PRODUCTS May liberate carbon monoxide or carbon dioxide.
HAZARDOUS MAY WILL NOT CONDITIONS TO AVOID POLYMERIZATION OCCUR X OCCUR Heat, sparks and open flame.
INCOMPATIBILITY (Materials to avoid) Acids, oxidizing materials.
VI - SPILL OR LEAK PROCEDURE INFORMATION
STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED Stop the source of leak or release. Clean up releases as soon as possible, observing precautions in Special Protective Information. Contain liquid to prevent further contamination of soil, surface water or groundwater. Clean up small spills using appropriate techniques such as sorbent materials or pumping. Where feasible and appropriate, remove contaminated soil. Follow prescribed procedures for reporting and responding to larger releases.
WASTE DISPOSAL METHODS Place contaminated materials in disposable containers and dispose of in a manner consistent with applicable regulations. Contact local environmental authorities for approved disposal of this material.
VII - SPECIAL PROTECTION INFORMATION
VENTILATION TYPE Local mechanical exhaust ventilation, capable of maintaining emissions at the point of use below the PEL.
RESPIRATORY PROTECTION Wear a NIOSH-Approved respirator, appropriate for the concentration of vapor or mist encountered at the point of use.
PROTECTIVE GLOVES Impervious EYE PROTECTION Wear eye protection to prevent any reasonable probability of eye contact.
OTHER PROTECTIVE EQUIPMENT Wear appropriate equipment to prevent any repeated or prolonged skin contact.
VIII - STORAGE AND HANDLING INFORMATION
PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE Keep out of reach of children. Store in a cool dry place away from incompatible materials. Keep container tightly closed when not in use. Workers should wash promptly when skin becomes wet. The following equipment should be available: Eyewash. It is generally recognized that contact lenses should not be worn when working with chemicals because contact lenses may contribute to the severity of the injury.
tightly closed when not in use. Workers should wash promptly when skin becomes wet. The following equipment should be available: Evewash. It is generally recognized that contact lenses

IX - TOXICITY INFORMATION TOXICITY: ORAL - No data found. DERMAL - No data found. INHALATION: No data found. "HEALTH HAZARDS for Isopropanol: ACUTE HEALTH EFFECTS: INHALATION - Vapors and mists irritate the nose and throat. Inhalation of higher concentrations may cause headaches, vomiting, and coma. Inhalation of very high concentrations or prolonged exposure may cause unconsciousness or death. EYE CONTACT: Vapors will irritate the eyes. Liquid and mists can severely irritate or damage the eyes and cause corneal burns. Skin CONTACT: Brief contact may dry the skin, or cause burning or stinging sensation. Prolonged or repeated contact may irritate the skin, causing dermatitis. SWALLOWED: Swallowing large quantities causes headaches, nousea, vomiting, stomach cramps and diarrhea, and perhaps unconsciousness, or death. CHRONIC EFFECTS OF EXPOSURE: Prolonged or repeated exposure to high concentrations can produce severe or fatal CNS depression. MEDICAL CONDITIONS GENERALLY
